

GhostHouses

Stage B Presentation

GhostHouses Team

Technion, Faculty of Computer Science

2025–2026 Yearly Project in Software Engineering

Agenda

- 1 User Stories to Use Cases to Issues to Sprints
- 2 Architecture
- 3 Customer-Side Deployment
- 4 Open Discussion

User Stories to Use Cases to Issues to Sprints

- TODO: Show the main user stories and actors.
- TODO: Map user stories to use cases.
- TODO: Map implementation issues to the relevant user stories.
- TODO: Show sprint/release checkpoints.

- TODO: Show where the design is abstract.
- TODO: Explain where we committed to concrete implementations.
- TODO: Explain why these decisions fit the project scope.

- TODO: Show class UML.
- TODO: Explain service interfaces and replaceable integration boundaries.
- TODO: Explain centralized validation and persistence boundaries.

Customer-Side Deployment

- TODO: Explain the customer-side deployment environment.
- TODO: Explain the Docker Compose deployment path.
- TODO: Explain the nested virtualization blocker and alternatives.

Deployment UML

- TODO: Insert or reference the deployment UML.
- TODO: Explain private municipality access, Docker networks, ports, and GIS API access.

Questions for the Audience

- TODO: Add the real technical/process question we want feedback on.
